ABSTRACT OF THE DISCLOSURE

~~In the conventional technology, there is a problem that a service is executed in contrary to user's intension. In order to solve the problem, the~~ A semiconductor memory card ~~(110) according to the present invention~~ includes[[:]] a direction obtainment unit ~~(707)~~ which obtains a first access direction type in which the semiconductor memory card ~~(110)~~ accesses the reader/writer; a condition management unit ~~(705)~~ which previously hold and manages an access condition including two or more of second access direction types; a condition judgment unit ~~(703)~~ which compares two or more of the first access direction types and two or more of the second access direction types, and judges whether or not they match each other; and an execution unit which executes a predetermined application program when it is judged that the first and second access direction types match each other.
